

KeyHIE Statistics*:

- **5.5** million patients with health records in KeyHIE
- **28,776** total activated MyKeyCare accounts
- **26** hospitals publishing information to KeyHIE
- **5,073** active KeyHIE users (in April 2016)
- **278K** accesses to patient records (in April 2016)

** as of November 1, 2017*

In this issue:

- Participant Milestone Achieved
- Next Round of P3N Grant Funding
- PA DOH Registries
- 2018 User Group Conference
- Information Delivery Service
- Connection to eHealth Exchange
- Service Catalog
- MyKeyCare Mobile App

100 Participant Milestone Achieved!

We've reached an epic milestone as KeyHIE now partners with 100 unique

healthcare organizations. Those organizations include 26 hospitals, 335 Physician Practices, 29 Home Health Agencies, 89 Long Term Care Facilities, one pharmacy, four EMS services, and three insurance payors. Congratulations to our KeyHIE members in the continued growth and success of sharing health information throughout Pennsylvania and beyond.

Next Round of P3N Grant Funding

A new round of PA eHealth Onboarding funding was announced in October. If you or a healthcare organization you know is interested in implementation funding, please contact Connie at 570-214-9438 or CLUTZ1@geisinger.edu.

Commonwealth of Pennsylvania Department of Health Registries

KeyHIE is now connected to the Electronic Lab Reporting registry via the Public Health Gateway. We are also in the initial phases of connecting to the Cancer Registry.

If you are interested in connecting, please contact Connie at 570-214-9438 or CLUTZ1@geisinger.edu.

2018 KeyHIE User Group Conference

Save the Date! KeyHIE will be holding its fourth annual user group conference on March 14, 2018 at the Pine Barn Inn, Danville. This year's conference will offer sessions on innovative technology and the future of health information exchanges as connections to state and national HIEs evolve. The conference will also highlight KeyHIE's successes and growth within the last year and provided updates on current and upcoming KeyHIE services. Attendees will participate in a "break out" sessions where they voice their opinions on what they would like to see

from KeyHIE in the years to come. This is a perfect opportunity to network with your colleagues and share insights.

Information Delivery System (IDS)

Through KeyHIE's IDS System innovative technology, we can proactively send notifications to a care team for patients admitted to (and discharged from) Emergency Departments and Inpatient settings as well as results delivery routing based on subscription/rules-based functionality.

KeyHIE connection to Sequoia eHealth Exchange

eHealth Exchange, or Sequoia Project, is the nationwide health information exchange that includes all 50 states, four federal agencies (DoD, VA, CMS, SSA), hospitals, medical groups, dialysis centers and pharmacies supporting 100 million patients. In November 2016, KeyHIE connected with Guthrie Health System and in June 2017, KeyHIE connected with the Veteran's Affairs (VA). The eHealth Exchange can be accessed in within the KeyHIE (Orion) Provider Portal.

Users who have access to the KeyHIE (Orion) provider portal will now see an additional tab, titled External Record, in a patient's record:

When the healthcare provider clicks this tab, he or she can search for information on their patient available in the P3N by selecting a "purpose" and location (PA-eHealth):

The image shows a screenshot of a web interface with two filter sections. The first section is labeled "Purpose *" and contains a dropdown menu with "Treatment" selected. The second section is labeled "Location *" and contains three buttons: "All", "Specific" (which is highlighted with a blue border), and "PA-eHealth" (with a small 'x' icon). To the right of these buttons is a blue "Change" link.

KeyHIE Service Catalog

We took your suggestions from the KeyHIE User Conference in March of 2017 and developed a KeyHIE Service Catalog. This document describes the catalog of services supported by KeyHIE such as MyKeyCare, Clinical Document Viewer, DIRECT Secure Messaging, Summary Viewer, EHR Publisher, Role-Based Notifications/Reminders, KeyHIE Notifications & Information Delivery, KeyHIE Transform LTPAC and KeyHIE Transform EMS. We hope to have this catalog finalized and rolled out to our members by late fall.

MyKeyCare Mobile App

MyKeyCare now has a mobile app for iPhone and Android. With an Internet connection, patients are able to securely access their health-related information when and where it is needed regardless of their location.

***Happy Holidays from the KeyHIE Team! Best Wishes for 2018!
See you at the User Group Conference in March.***
